December 15, 2021

Aloha Residents, Responsible Parties and Families,

On Wednesday, December 15, 2021 Aloha Nursing Rehab Centre was notified that a contractor has tested positive for COVID-19. The last time this individual was in the facility was on Friday, December 10, 2021. Per Hawaii Department of Health Outbreak Division when determining risk of exposure, it is based on a 48 hour look back period from symptom onset. DOH has determined that there was no direct exposure to our residents or the facility.

Out of abundance of caution we are notifying the responsible parties and COVID tested the residents that the contractor met with. We will continue to monitor these residents for development of symptoms for 14 days.

COVID-19 is a very sneaky virus. We all have the ability to play a large role in combating this pandemic. We urge everyone to do their part both in and outside of our facility to stop the spread of the virus. These include wearing a face mask, washing your hands frequently, covering your nose and mouth when coughing or sneezing, avoid large gatherings, practice physical distancing and if you are feeling ill do not visit the facility .

Please continue to do periodic self-wellness check for COVID-19 symptoms which include: fever, headache, sore throat, scratchy throat, dry throat, nasal congestion, runny nose, cough, chest congestion, sneezing, chills, muscle ache/pain, unusual tiredness or fatigue, nausea, vomiting, diarrhea, loss of taste and/or smell, shortness of breath or other respiratory illness. If you experience any of the above symptoms, please contact your health care provider.

Sincerely,

Vanessa Bruns  
Quality & Compliance Officer
